

Neeru Nayak — Frontend Developer

[Email](#) | [Portfolio](#) | [GitHub](#) | [LinkedIn](#) | +917208691093 | Ernakulam, Kerala, India

PROFESSIONAL SUMMARY

Frontend Developer specializing in **React.js**, JavaScript, and modern UI development. Built and deployed **5+ production-ready web apps** with strong focus on responsive design, API integration, and reusable component architecture. Recently re-entered tech with fresh, hands-on project experience; previously worked in enterprise Java systems at Infosys.

Immediate availability • Open to remote-first opportunities .

CORE SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind, Bootstrap, SPA, Responsive UI

Backend/Tools: Node.js, REST APIs, Git, GitHub, Vite, Chrome DevTools, Vercel

Soft Skills: Problem Solving, Communication, Collaboration, Adaptability

• Recent Projects (Freelance / Personal Projects) March 2025 – Present

- Built **5+ modern web applications** independently using **React.js, JavaScript, Tailwind CSS, and REST APIs**, focusing on clean UI, responsive design, and production-ready functionality.
- Developed **15+ reusable React components**, improving modularity and reducing development time by ~30%.
- Integrated REST APIs with proper error handling and loading states for seamless UX.
- Deployed responsive, SEO-friendly apps using **Vercel**.
- Applied version control, best coding practices, and component-based architecture to simulate professional development workflow.
- **Highlighted Projects:**
 - **React Portfolio:** Tailwind + Framer Motion; optimized load time (<1.2s).
 - **Dynamic Node Abstraction Tool:** ReactFlow-based modular builder with AI-powered hints (Vector Shift's technical assessment)
 - **Recipe Finder App:** Integrated APIs with dynamic search and filters.

PRIOR EXPERIENCE

Freelance Android Developer & Designer | 2012–2016

- Built a real-time OBD-based Android app for an Australian client (fuel %, RPM, and engine data).
- Developed Android mini-apps using Java/XML and delivered end-to-end UI designs.
- Created visual assets (logos, banners, app graphics) using Photoshop.
- Managed client communication, requirements, delivery timelines, and releases.

Software Engineer — Infosys Limited | Nov 2010 – Jan 2012

- Supported **Apple Directory Services** backend using Java & Oracle DB.
- Built student-course registration modules using JSP & MySQL.

EDUCATION & TRAINING

B.E. – Computer Science, Rajiv Gandhi Technical University — CGPA 7.5/ 10

Certifications: Infosys Foundation Training , Udacity Android Apps, AWS Cloud Practitioner (In Progress)

ADDITIONAL DETAILS

Languages: English (Fluent), Hindi (Native)

Availability: Immediate

Career Break (2016–2024): Focused on personal priorities while continuously upskilling. Completed multiple modern frontend projects using React.js, REST APIs, and Tailwind to return with refreshed, job-ready expertise.
